

## Peptide & Injection Support Menu

Offered through Twin Rivers Physical Therapy & Wellness

We offer a curated selection of peptide and injectable support options designed to complement physical therapy, wellness services, and personalized care plans. All peptide protocols are offered in partnership with a licensed medical clinic and require medical oversight.

To order: Please speak with **Polly at TRPT**, who will coordinate the process and help you get started.

### METABOLIC SUPPORT

**Tirzepatide** – Supports metabolic health, insulin sensitivity, appetite regulation, and cardiometabolic balance.

**Semaglutide** – Supports appetite signaling, blood sugar balance, portion control, and metabolic consistency.

**AOD-9604** – Supports fat metabolism, metabolic efficiency, and body composition pathways.

**Lipo-B Injection** – Supports liver health, fat metabolism, energy production, and detox pathways.

### CELLULAR SUPPORT

**NAD+** – Supports cellular energy production, mitochondrial function, cognitive support, and healthy aging pathways.

**MOTS-c** – Supports mitochondrial health, metabolic flexibility, cellular energy, and physical resilience.

**Glutathione** – Supports antioxidant defense, immune balance, liver detox pathways, and cellular protection.

**GHK-Cu** (Copper Peptide) – Supports cellular regeneration, collagen production, skin health, and connective tissue support.

**Meno Matrix Stack** (AOD-9604 + MOTS-c) – Combo designed to help women in peri and menopause feel more at home in their bodies again.

## RECOVERY & REPAIR

**BPC-157** – Supports soft tissue repair, gut integrity, and inflammation regulation.

**TB-500** – Supports muscle, tendon, ligament, and connective tissue recovery and flexibility.

**Wolverine Protocol** (BPC-157 + TB-500) – Comprehensive recovery and tissue repair support.

**Glow Protocol** (BPC-157 + TB-500 + GHK-Cu) – Full-spectrum recovery and cellular support.

## HORMONAL & REGULATORY SUPPORT

**Sermorelin** – Supports natural growth hormone release, sleep quality, muscle recovery, bone health, and vitality.

**Semax / Selank** – Supports nervous system regulation, mood balance, focus, and stress resilience.

## Medical Oversight & Ordering

All peptide protocols require a brief telehealth visit with a partnering physician (*a payment of \$20 is made directly to the physician*).

Prescriptions are issued by a licensed provider. Medications are compounded by specialized 503A or 503B pharmacies and shipped on dry ice directly to your home with all supplies included.

*Important Information: Peptide and injectable therapies are intended to support wellness and recovery and are not a replacement for medical care or physical therapy. Individual responses vary.*
